

NRO Readies Open Source Cloud For Launch

October 26, 2012

Henry Kenyon
AOL Government

In a move toward a more efficient National Reconnaissance Office, analysts for the agency operating the nation's spy satellites are on the verge of getting their information through a top-secret open-source cloud environment housing intelligence data.

Jill Singer, the agency's chief information officer, offered the latest details on the project at this week's Red Hat Government Symposium in Washington D.C.

...
