

What the Intelligence Community Is Doing With Big Data

February 05, 2013

Bernhard Warner
Bloomberg BusinessWeek

What if the government could know the future?

It's trying. Armed with billions of tweets, Google searches, Facebook posts, and other publicly available social-media and online data, the Office of the Director of National Intelligence is sponsoring research projects involving 14 universities in the United States, Europe, and Israel with the goal of using advanced analytics to predict significant societal events.

...
