

SPIONAGE YOUR ROLE IN KEEPING OUR NATION'S INFORMATION SAFE

The Counterintelligence Awareness Library

ESPIONAGE/

Although money is usually involved, the motives for committing espionage are far more complex than just greed. Many convicted spies have identified other motivational factors that led them to espionage, such as: anger or disgruntlement towards their employer, financial need, ego enhancement, and ideology.

Spies do get caught, but often only after much damage has already been done. The impact on family, friends, coworkers, and national security is devastating.

Keeping It Real

One of your closest friends from college is a naturalized U.S. citizen, but he still maintains close ties to family, friends, and former colleagues in China. While the two of you are out for a drink one evening, you confide that you are financially strapped due to your recent divorce. He offers to help you out financially in exchange for providing him with the specifications to your company's latest technological innovation.

YOUR RESPONSIBILITY/

- **Stay alert.** Recognize that situational stressors and personality characteristics often lead people to commit espionage. Early intervention in a personal crisis could save someone from making the worst decision of their life.
