

Intelligence Community Public-Private Talent Exchange Pilot

Economic Security and Financial Intelligence (EFX)

The intent of this initial stage is to send IC officers to the private sector. We are finalizing our processes and procedures to host private sector personnel in the IC. We will post more information to our website in the near future.

Exchange

A cohort of Intelligence Community (IC) officers will complete a 6-12 month assignment in economic/financial sector organizations to gain expertise and exposure to the commercial environment. Cohort individuals will work independently at designated organizations and come together monthly during their assignments to assess progress. The IC will send officers who have at least 5 years of IC experience, demonstrated ability to work independently, flexibility to new environments and culture, and ability to quickly adapt and achieve objectives.

Purpose

The IC is seeking to enhance IC knowledge and skills related to economic and financial operations, practices, and relationships. This pilot will improve mission performance by identifying commercial best practices in operations, analysis, and organizational management and adapting them for benefit of the IC. The EFX pilot will capitalize on the robust expertise and insights of the US economic sector to professionalize economic and financial training and career development of IC officers. Relationships built during this pilot and future rotations will provide a foundational network of leaders that can be leveraged for future economic security and financial intelligence discussions.

Private Sector Organizations

The IC is interested in opportunities with private sector organizations who:

- Have a global footprint, decentralized operations, and/or subsidiaries
- Industry leaders for innovation and workforce culture
- Focused on foreign investment, foreign supply chains, or a broad foreign customer base

Please let us know if you are interested in the program or have any comments or questions at IC_PPTe@odni.gov.
