The UAP that was viewed by a group of old friends of mine was seen by me, and three other groups, at separate times.

Our group viewed it in Gander, Newfoundland. However, it was written in the Gander Beacon (Newspaper) as a weather balloon. Another group viewed it during the night, at the end of the Gander Airport runway. The third group viewed it in Labrador, near a US Military installation.

Maybe they were "significant locations" pointing to the Arrow Air Disaster. Maybe they were trying to get us to dig deeper into the two missing bodies, and the weapons on board, but more importantly the Middle East rift it caused.

I included most of this in a report I sent to the CIA, it's not proof read very well, but I didn't have time because of what happened on January 6th

I think I'm going to use it as a digital download to sell my book.

I don't think you need another Oliver North.

# The January 6t...
