Component Mission
The National Counterterrorism Center (NCTC) leads our nation's effort to combat terrorism at home and abroad by analyzing the threat, sharing that information with our partners, and integrating all instruments of national power to ensure unity of effort. The Center serves as the primary organization in the United States Government (USG) for analyzing and integrating all intelligence possessed or acquired by the USG pertaining to terrorism and counterterrorism, and its Director serves as the Counterterrorism Mission Manager. NCTC also serves as the central and shared knowledge bank on known and suspected terrorists and international terrorist groups, as well as their goals, strategies, capabilities, and networks of contacts and support. In addition, NCTC conducts strategic operational planning for counterterrorism activities, coordinating and integrating the efforts of departments and agencies across the Federal Government.

Major Duties and Responsibilities (MDRs)
• As an IT Architect, you will be responsible for ensuring the Center's IT capabilities continue to keep pace with evolving CT Threat and challenges. The officer will work closely with senior leadership, Mission partners and the technical contract staff to design and implement NCTC’s next generation, secure, IT architecture.

Mandatory and Educational Requirements
• Proactively building partnerships with NCTC mission elements to gain a full understanding of NCTC mission capabilities and challenges.
• Demonstrated strong interpersonal skills and team player with ability to work across organizational boundaries, work with partners, and take a corporate approach to achieving mutual objective.
• Provide technical guidance for NCTC architecture and long-term strategic initiatives to meet present and future mission needs via strategies and roadmaps developed in partnership with ITS technical teams and management.
• Recommend design engineering solutions and alternative design options to meet customer requirements and provide guidance in the design and development of engineering solutions.
• Lead in recommending how to integrate new services/projects in our current and future architecture, while maintaining the flexibility to support mission needs.
• Deconflict complex functional requirements into underlying technical requirements and recommend “best fit” allocation of those requirements.
• Conducting solid risk analysis activities to identify and recommend appropriate mitigation plans for innovative architecture initiatives.
• Provide strategic leadership in identifying, defining, and coordinating NCTC needs and translating them into technical requirements.
Desired Requirements

- Bachelor's degree, preferably in Engineering, Computer Science, Management Information Systems, or equivalent work experience.
- Experience in an IT environment with demonstrated excellent performance in project/program leadership roles.
- Ability to provide an enterprise-wide/end-to-end perspective into IT-related decisions.
- Effective risk management skills.
- Expert experience in cross community complex programs and making expert recommendations to improve products and services.
- Superior interpersonal, organizational, and problem-solving skills, including a demonstrated ability to work effectively both independently and in a team or collaborative environment.
- Expert ability to monitor trends in development, including the ability to assess the viability of competing technologies and recommend the adaption of emerging technologies.
- Knowledge of Cloud computing and the IC Information Technology Environment.
- Tracking and communicating the impact to mission of technical innovation efforts in support of long-term strategic initiatives.
