- Lead and/or oversee complex ODNI Enterprise-wide Information Technology (IT) projects or programs that may include ill-defined requirements, ambiguity, parallel tasks, multiple dependencies, high risks, and multiple interfaces; ensuring alignment with strategic or corporate objectives; leading the definition and review of customer and stakeholder requirements; ensuring plans and schedules are developed and followed throughout the life of the project.
- Lead and guide the resolution of issues in project plans and schedules based on a clear understanding of customer requirements and information on project cost, schedules, quality, and performance; provide expert oversight of cost and resource estimates; participate in budget planning activities and develop cost estimating

strategies for future projects. Manage standard and IDIQ IT contract from requirements gathering to full implementation. Monitor schedule, cost and risk of contract.

- Lead the definition and review of customer and stakeholder requirements; ensure plans and schedules are developed and followed throughout the life of the project.
- Develop analysis of program alternatives.
- Lead and guide the resolution of issues in project plans and schedules based on a clear understanding of customer requirements and information on project cost, schedule, quality, and performance; provide expert oversight of cost and resource estimates; participate in budget planning activities and develop cost estimating strategies for future projects.
- Provide leadership and/or oversight to the successful execution of spend plans and assess variances from cost and schedule baseline; oversee the reallocation of resources in response to change considering impact to project cost, schedule, and quality of deliverables.
- Manage the expectations of senior-level customers and ensure the delivery of quality products and services; lead the examination of project successes and failures and develop solutions to improve products and services.
- Provide leadership and guidance to the identification and mitigation of project risks by identifying the risk tolerances of senior-level customers and other stakeholders to determine overall acceptable levels of risk; conduct risk analysis to identify and prioritize risks; characterize threats and opportunities to determine mitigation strategies.
- Lead project teams to ensure project is completed on time, effectively apply team building and coaching techniques, and exchange project or technical information with team members and contractors at formal and informal meetings.
- Oversee the work of team members; monitor work activities to ensure counterintelligence and security policies and procedures are followed; provide help or assistance to team members or others when needed; communicate needs and requirements to project team members.
- Based on assignment, may lead all aspects of contract management and oversight to include leading competitions and contract renewal from beginning to end; work closely with mission customers, organizational management, and the Contracting Officer (CO); serve as the Contractor's principal point of contact for technical management after contract award; direct and coordinate technical and program issues, establish objectives, develop requirements, establish schedules, estimate costs, develop budgetary controls, monitor technical aspects of the contract, and monitor the contractor's performance; work closely with the CO to assist in contract negotiations, including determining viable options for cost.

Mandatory and Educational Requirements

- Demonstrated ability to lead all aspects of contract management and oversight, to include leading competitions and contract renewal from beginning to end; working closely with mission customers, organizational management, and the Contracting Officer (CO) to implement solutions; serving as the Contractor's principal point of contact for technical management after contract award; directing and coordinating responses to

technical and program issues, establishing objectives, developing requirements, establishing schedules, estimating costs, developing budgetary controls, monitoring the contractor's performance; and working closely with the CO to assist in contract negotiations, including determining viable options for cost.

- Demonstrated performance in providing leadership, oversight, and guidance to the effective management of complex projects; including managing and mitigating risks, assessing customer requirements, identifying dependencies, and developing responsive project plans; and estimating costs and other resources using quantitative analysis to project requirements.
- Strong ability to oversee the work of team members; monitor work activities to ensure counterintelligence and security policies and procedures are followed; provide help or assistance to team members or others when needed; communicate needs and requirements to project team members.
- COTR level II certification, with a willingness to achieve COTR level III certification within one year of taking the position.

Desired Requirements

- Extensive knowledge of IC information management security guidelines, document storage, and classification guidelines.
- Demonstrated research, planning, and organization skills, and demonstrated ability to manage changing and competing priorities under strict timelines while maintaining a high level of attention to detail.
