

(Page 1 of 4)

We praise the praise that is sufficient for God and we ask for His assistance and forgiveness and His help to keep us away from our evil selves and our evil wrongdoings. Whoever God puts on the right path no one can deviate and whoever deviates cannot be put on the right path. I vow that there is no God but Allah and He hath no partner and I vow that Muhammad is His servant and messenger.

After all...

To the Islamic nation in general and to our people in Tunisia, especially.

Peace, mercy and the blessings of Allah be upon you...

Current subject on these blessed days...

To begin, I extend my congratulations and condolences to our people in all of the green Tunisian states.

I say: May God reward you graciously for your loss and keep your heart strong and keep you steadfast on His strong solid road

I also ask God the Almighty to have mercy upon those who were killed in those clashes, which were characterized by courage, and which brought about the fall of the regime, make their sweet blood the beginning for the restoration of the glories of our proud nation, for Tunisians and all Muslims in those brave, steadfast, successful, and promising positions.

The victory that was achieved by the sons of the nation in Tunisia, in the overthrow of one of the tyrants in the region, the aggressors of the dignity of the people and the wealth of Muslims, has important reasons which should be understood by all the people of the Muslim nation. The most important reasons, after the will of God, are not the large number of men, numbers, or lack thereof, these are not the important factors for the success of revolutions. The first, most important reason, which we need to ponder on, is awareness. Their awareness has already increased in parts of understanding their reality, for they have realized the immensity of the financial and administrative corruption of the rulers and their deception and trickery of the people. Their knowledge was confirmed after documents were leaked from the American State Department, their greatest ally. This awareness in the atmosphere, at the regional and world

level, was plagued by poverty, and the world had become multi-polar.

Important factors also...

(Page 2 of 4)

Here, we should pay attention to a very important matter, and that is that many of the peoples of the world have revolted and overthrown the oppressive regimes and removed many of the oppressors. But they were deceived, and were tricked into doing things, like stripping numerous rights, as is the case in many countries of the world. There are other revolutions that circumvented them and increased the ferocity and lessened the disguise, and of these revolutions is the revolution of the Muslim peoples in Algeria and Tunisia under the name of colonialism, which subjected them to great sacrifices, and that sacrifice freed us from military domination. However, the people's awareness was weakened by the methods and condition of the major powers. They remained followers of the ideas, cultures, and politics of the West, who controlled them. The rulers took the role of proxy for the occupation, fighting our ideology, destroying our economy and implementing the plans of the enemy.

Our lack of realization and awareness of such deception has wasted decades and spilled the blood of the pious. It is our duty to warn from falling into a new deception, returning our suffering and to miss this historic opportunity to liberate the nation. The Prophet said, peace be upon him (The believer will not be hit with the same stone twice.)

Accordingly, one of the most important priorities is to seek to raise the awareness of the peoples of the nation, until the misconceptions of the revolutions are removed from the awareness of all of the Muslim world, to warn them against the taking of some rights and squandering this great chance. Do not be crippled by the weakness of our awareness.

The greatest significance of it all is to implement the meaning of (there is no God but Allah) and to achieve awareness around the earth of these great words, which liberated the Arabs from paganism, deviation and poverty, to leading nations for centuries of time until the Muslims failed to fulfill this meaning. It is necessary for the true scholars to put their focus on the meaning and value of these great words, to get the people to the safe shore of their belief against confusion or

intentional deceit. The general morals, traditions, and recommendations of Islam are to follow the leader's orders... There is no God but Allah.

On this podium I say, whoever desires the earthly heaven with the best of what can be offered, they need to read the book "Understandings that Need to be Corrected" and whoever wanted to endeavor to go to the everlasting paradise, the house of immortality, then he needs to read the book "Understandings that Need to be Corrected" by Shaykh Muhammad Qutb. This is the greatest book that he has written and it seems to have been written at that time for these current events.

(Page 3 of 4)

The basis of the awareness of the people and the safety pin is the presence of a scale that men could use to evaluate their actions and their words; the essence of this scale is to become aware of the value and the meaning of "There is no God but Allah" and to evaluate these men is to determine how much these men adhere to "There is only one God." Whoever left the meaning of those words intentionally and directly, he is an enemy of God and the believers, and even if he had talked about the Book and the Sunnah and grew a long beard and shortened his clothes.

In conclusion, I say: the affliction that had impacted the Muslim countries had two major reasons: first, the existence of American-Western hegemony over us. The second is the presence of rulers that have abandoned the provisions of Shari'ah and have become part of this American hegemony to achieve its interests, in return for the achievement of some of their interests. With this perception we understand how difficult it was for Tunisia to liberate itself alone. Many of the political parties are submissive and lack determination when it comes to the world powers.

Subordination

(Page 4 of 4)

There is a Renaissance of our Muslim nation in our current time and there are steps it had overcome on the road to return to its dynasty. Also, we need to follow those steps in order to triumph so give me your attention. The road in front of us is to establish the Religion and to remove what had happened to the Muslims from scrutiny, by removing the oppression that is happening to the nation and the worshippers, to not permit the

continuation of any government that rules by what God had orders us to through Shari'ah. The way to lift this oppression is by the continuation of directly exhausting the American enemy, until it breaks and becomes too weak to interfere in the affairs of the Islamic nation.

(End of Translation)
