The chart represents national debt as a percentage of GDP for various regions and economic groups, comparing data from 2007 (Prefinancial crisis), 2010 (Post-financial crisis), 2019 (Pre-COVID-19), and 2020 (Immediate aftermath of COVID-19).

- **G7 Economies** exhibit the highest debt percentages, with marked increases post-financial crisis and COVID-19.
- **Emerging and Developing Asia** also show significant increases, particularly post-crisis and COVID-19.
- **Latin America and the Caribbean** have moderate debt levels, with a notable rise post-COVID-19.
- **Middle East and Central Asia** and **Sub-Saharan Africa** present lower debt percentages, with some growth post-crisis.
