Climate change eroding human security and environmental degradation.

**Simultaneous Drivers**
- Higher temperatures
- Melting Arctic
- Extreme weather
- Sea level rise
- Land degradation
- Water misuse
- Pollution

**Key Challenges / Uncertainties**
- Pace
- Unequal burdens
- Geoengineering

**Mitigation**
- Energy technologies

**Adaptation**
- Societal and government change

**Pace**
- Unequal burdens

**Instability**
- Conflict
